EXPERIENCE

2022 - PRESENT
FIVEM SERVER DEVELOPER & FREELANCE WEB DEVELOPER

- Led teams of 3-5 developers on projects for clients in the US, UK, and Romania, delivering features on schedule.
- Frontend scripting with Svelte and React + TypeScript, backend with Lua, in production environments with real users.
- Development of websites and online stores for clients: design, architecture, delivery, and independent deployment.
- Deployment and maintenance of web applications with REST API integration on Vercel, applying continuous delivery practices.

MAY 2026

INTERN AT NATURALSOFT (MEDICAL SOFTWARE)

- Migration of clinical data to production in active clinics (including a client in Peru): medical records, cycles, pregnancies, semen analyses, and cryogenic storage.
- Design of a galaxy dimensional model for Power BI and UI/UX improvements for clinical analysis dashboards.
- Setup of a local development server with production-level layers.
- Training in Java (generics, lambdas, Streams) and agile methodologies.
- Stack: Velneo · DBeaver · Power BI · SQL · Java.
